PROJECTS

- **DTMF CELLPHONE CONTROLLED HOME APPLIANCES**:This project is used to control any electrical appliances using mobile phone without the use of a microcontroller. This project makes use of DTMF decoder to control the electrical appliances. More than one electrical devices can be controlled using this circuit.
- **OBSTACLE DETECTION AND AVOIDANCE IN AUTONOMOUS VEHICLE**: This project would be an electronic car that keeps on moving in straight line until something comes in its path.
- **LINE FOLLOWER USING MSP430G2 LAUNCHPAD**:A line follower bot is as the name suggests a bot that follows a line. This line can be either a dark one on white surface or a white line on black surface. So once we switch the bot ON it will keep on following the path that we create using the line.
